

Live Class Addon

Ekattor School Management System

Developer Guide

Copyright 2020 Creativeitem. All rights reserved.

Source Code Structure:

We followed standard MVC structure within the powerful Php Codeigniter framework to develop Ekattor.

	<p><u>Structure of Live class addon:</u></p> <p>Controllers:</p> <ul style="list-style-type: none">- Live_class.php : Has all the controller functions. <p>Models:</p> <ul style="list-style-type: none">- Live_class_model.php : This model file has all the database queries related to live class addon. <p>Views: These are all the view files.</p> <ul style="list-style-type: none">- admin<ul style="list-style-type: none">- index.php- settings.php- student<ul style="list-style-type: none">- index.php- list.php- meeting.php- superadmin<ul style="list-style-type: none">- index.php- settings.php- teacher<ul style="list-style-type: none">- create.php- edit.php- index.php- list.php- mail.php- meeting.php <p>SQL:</p> <ul style="list-style-type: none">- updater.php : This is the database updating file. <p>Config.json : This is the main file for installing an addon.</p>
