## Quick Start Guide for Admin:

- Login as site administrator to organize your system.
- At first update your System Settings. Also, make sure to provide a valid YouTube API key and a valid Vimeo API key on System Settings. The YouTube API key field must be filled in with a valid API key.
- Before adding a course, note a few things. Since each course will be added under a class and subject, make sure that your class is created before adding the course and the subject is created under that class.
- Now its time to create some Courses. Since a course will contain all the video lessons you have to create it carefully. Go to **Online Courses** option from the left menu, You will get a “Add Course Form” after clicking on the “+ Create New Course” button. Fill all the fields carefully.
- To add Lessons, click on the 3 dots. You can see the **Section and Lesson** menu, which will take you to the curriculum if you click here. Here you will do all the work of this course.

## Quick Start Guide for Student:

- Since the application has been already installed. Students can now access **Online course** from their user menu.

- All courses have been divided by class. Students will only have access to their own class courses.
  
- Click on Start Lesson to begin the course. You will then be taken to the course play page. Here you will find course videos, quizzes, and files. Complete the lesson and tick it, it will increase your progress bar.
